1. Introduction:

The size and geographical distribution of deaths in relation to prevalence of diseases, evaluation of risks of deaths from various causes at different ages, the medical implications of combination of the conditions resulting in death, proportion of deaths occurring in hospitals are a crucial aspect of interest to many professionals. Public health executives, Administrators, policy makers, researchers and other professionals, therefore depend heavily on analysis of causes of death for vital statistical data, for formulating National and State health care policies and programs. It is fundamental for monitoring as well as improving the methods of diagnosis and analysis and also plays an important role in advanced medical research. Medical Certification of Cause of Death forms are an integral part of the Vital Statistics System under Registration of Births and Deaths system which aims at providing a reliable database for generating cause specific mortality statistics on a regular basis.

Currently, Medical Research is facing challenges from the spread of a variety of disease like Cancer, AIDS, Heart Diseases, Juvenile diabetes, non-communicable & communicable diseases, Swine flu and Chikungunya etc. Good documentation of information on the causes of death is indispensable for tackling these issues. Recognizing this fact and in order to draw the profile of different natural and manmade causes of death, under the aegis of World Health Organization, the international community of Medical Professionals have codified most of the disease labeling them “International Classification of Diseases (ICD)” This ICD is customized to the Indian conditions under the scheme of ‘Medical Certification of Cause of Death (MCCD)’.

This report is based on the 10th revision of ICD. The statistics presented in this report, give information on cause specific mortality cross classified by sex and age groups.

Methodology

The necessary data is collected in the prescribed formats i.e. form no.4 for institutional deaths and form no. 4A for non-institutional death. These both formats are to be filled up by the medical professional who has attended the deceased. Thereafter, these filled formats are to be submitted to the concerned registrars of the birth and death for the detailed tabulation as per the national list of causes of death based, based on the tenth revision of International classification of disease (ICD 10) for onward transmission to the Chief Registrar’s office. Afterwards, the state government submits this to the office of the Registrar General of India in the standardized format for the national level consolidation.

Scheme of MCCD: Status of Implementation:

In order to take the MCCD Scheme forward in a systematic manner in the country, the Registrar General, India has been impressing upon all the States/Union Territories to bring

all hospitals (Government & Private) and private medical practitioners under its coverage, both in rural as well as urban areas by imposing issue of Notification. In this context it is mandatory for all hospitals (Government & Private) to fill MCCD form alongwith death report form on Pehchan Web Portal. 5010 hospitals (Government & Private) are reporting under this scheme. The scheme is limited to institutional deaths only. Though the sample is representative, sweeping generalizations are not recommended, since a large number of rural as well as urban events occurred at home are not being covered under this scheme.

MCCD Status: State Scenario: Flow of Data and Processing:

The certificates of cause(s) of death certified by the doctors are scrutinized & coded as per ICD-10th Revision derived as per the National list prescribed / designed by the Registrar General, India and sent in the prescribed format directly from the institutions covered under the scheme of MCCD on regular basis to the Directorate.

Scope of the report

The Rajasthan State government report on Medical Certification of Cause of Death – 2022 is based upon total 83826 (Males: 54849 and Females 28977) medically certified deaths (18.34 percent of total registered deaths). As mentioned above, owing to different levels of efficiency of medical certification across the State, the number of deaths reported therein may lack the representative feature in the strict sense. However, it may be sufficient to throw some valuable insight into deaths by various cause groups.

2. Findings the introduction of leading cause of death:

During the year 2022 the highest leading cause of deaths are following :

- 1 Diseases of Circulatory System (23.45%)
 - 2 Symptoms, signs and abnormal clinical and laboratory findings (15.57%)
 - 3 Diseases of Respiratory System (14.83%).
 - 4 Certain Infectious And Parasitic Diseases(8.5%)
 - 5 Certain Conditions Originating in the perinatal Period(8.04%)
- Among the major cause group “Diseases of Circulatory System”, have been registered the highest deaths account 57.61% for the “Diseases Of Pulmonary Circulation And Other Forms Of Heart Disease”
 - ‘Symptoms, signs and abnormal clinical and laboratory findings’, is the second leading cause group, in which the total deaths have been for this group.

- 'Diseases of Respiratory System' is the third leading cause group have been registered the highest deaths account 65.4% for the "Other Diseases Of The Respiratory System"
- The fourth leading cause group "Certain Infectious And Parasitic Diseases" in this group have been registered the highest deaths account 55.12% for the "Other Bacterial Diseases".
- The fifth leading cause group 'Certain Conditions Originating in the perinatal Period' in this group all deaths are for this group

3. Finding the introduction of death by the Age group wise:

- Around 12.51% of reported medically certified deaths have been of the infants (age less than 1 year).
- About 64.28% of infant deaths have been reported to be caused by 'Certain conditions originating in the perinatal period' out of total infant deaths.
- Around 1.13% of reported medically certified deaths have been of the children aged '1-4'.
- Among the children aged '1-4' Symptoms, signs and abnormal clinical and laboratory findings" have taken the highest toll of 18.62%.
- Around 1.98% of reported medically certified deaths have been of the children aged '5-14'.
- In the age group '5-14', major group 'Symptoms, signs and abnormal clinical and laboratory findings' is in the topmost position with the share of 23.25%.
- Around 5.64 % of reported medically certified deaths have been in the age group '15-24'.
- In the age-group of '15-24', major group, 'Symptoms, signs and abnormal clinical and laboratory findings' is the first among the leading causes contributing around 19.82%.
- Around 9.13% of reported medically certified deaths have been in the age group '25-34'.
- In the age-group of '25-34', major group, 'Symptoms, signs and abnormal clinical and laboratory findings' contribute around 20.07% of death under this age group.
- Around 10.22 % of reported medically certified deaths have been in the age group '35-44'.

- In the age-group '35-44', major leading cause is "Diseases of Circulatory System" having share of 18.72% .
- Around 13.08% of reported medically certified deaths have been in the age group '45-54'.
- For the age-groups of 45-54, the leading causes of death is 'Diseases of Circulatory System' having 26.59%.
- 16.74% of the total medically certified death comes under the age group '55-64'.
- In this age group 55-64 the first leading cause of death are 'Diseases of Circulatory System' (30.20%)..
- Around 9.09% of reported medically certified deaths have been in the age group '65-69. The leading cause of death is 'Diseases of Circulatory System' (32.83%).
- The age group 70 and above contributes the maximum incidence (20.48%) of total medically certified deaths. The leading causes of death are 'Diseases of Circulatory System' (35.63%).

4. Finding the introduction of death by the Gender wise:

- Out of total medically certified death, 65.43% are from males and 34.57% from female.
- There is significant difference between males and females for all age groups under medically certified deaths.
- The difference in percentage is significantly high in all age groups.
- For infant age less than one year, 62.17% of deaths are from male and 37.83% female.
- Around 58.41% of deaths are from male and 41.59% female in the age group 1-4,.
- 57.87% are male deaths and 42.13% are female deaths in the age group 5-14.
- 15-24 age group comprises 59.85 % male deaths and 40.15% female deaths.
- In the age group 25-34, 66.97% of deaths are from male and 33.03% female.

- Around 70.62% of deaths are from male and 29.38% female in the age group 35-44.
- In 45-54 age group, 71.57 % are male deaths and 28.43% are female deaths.
- 55-64 is the age group in which 67% are male deaths and 33% are female deaths.
- In the age group 65-69, male deaths are 65.35% and 34.65% are female deaths.
- In the age group 70 and above, 61.67% of deaths are from male and 38.33% female.

5. Comparison of MCCD and CRS Data:

The data on MCCD is presented as per the National List based on 10th revision of International Classification of Diseases (ICD-10), to facilitate meaningful comparison and drawing valid conclusions thereof. The report aims at summarizing the findings of the data reported on medically certified deaths for Rajasthan by age, sex and major cause-groups. 'The report on Medical Certification of Cause of Death – 2022 is based on 83826 (Males: 54849 and Females:28977) medically certified deaths. This represents 18.34 % of total registered deaths in the State during the year 2022

Table 2.1 Number of deaths reported under CRS and MCCD

Year	Registered Deaths under CRS	Institutional Death	MCCD	Percentage of total Deaths	Percentage of Inst. Deaths
2021	475730	130714	110916	23.31	84.85
2022	456869	104025	83826	18.34	80.58

Table 2.1 gives a comparison of death under Civil Registration System (CRS) and Medically Certified Death. It may be noted that in the year 2022, only 18.34% of total registered deaths in the state are medically certified, which was 23.31% in the year 2021.

The age wise cause of death total for twenty two major classifications are also separately given page no. 8-9.

Table 2.2 Age wise number of deaths reported under CRS and MCCD

Age group	Registered Deaths under CRS	MCCD	Percentage of total Deaths
Less than 1	10703	10488	97.99
1-4	1971	945	47.94
