1. Introduction:

The size and geographical distribution of deaths in relation to prevalence of diseases, evaluation of risks of deaths from various causes at different ages, the medical implications of combination of the conditions resulting in death, proportion of deaths occurring in hospitals are a crucial aspect of interest to many professionals. Public health executives, administrators, policy makers, researchers and other professionals, therefore depend heavily on analysis of causes of death for vital statistical data, for formulating national and State health care policies and programs. It is fundamental for monitoring as well as improving the methods of diagnosis and analysis also play (MCCD) an important role in advanced medical research. Medical Certification of Cause of Death forms are an integral part of the vital statistics System under Registration of Births and Deaths system which aims at providing a reliable database for generating cause specific mortality statistics on a regular basis.

Currently, Medical Research is facing challenges from the spread of a variety of disease like Cancer, AIDS, Heart Diseases, Juvenile Diabetes, Non-Communicable & Communicable Diseases, Swine flu, Corona virus and Chikungunya etc. Good documentation of information on the causes of death is indispensable for tackling these issues. Recognizing this fact and in order to draw the profile of different natural and manmade causes of death, under the aegis of World Health Organization, the international community of Medical Professionals have codified most of the disease labeling them "International Classification of Diseases (ICD)" This ICD is customized to the Indian conditions under the scheme of 'Medical Certification of Cause of Death' (MCCD).

This report is based on the 10th revision of ICD. The statistics presented in this report, give information on cause specific mortality cross classified by sex and age groups.

Methodology

The necessary data is collected in the prescribed formats i.e. form no.4 for institutional deaths and form no. 4A for non-institutional death. These both formats are to be filled up by the medical professional who has attended the deceased during his illness. Thereafter, these filled formats are to be submitted to the concerned registrars of the birth and death for the detailed tabulation as per the national list of causes of death based, based on the tenth revision of International classification of disease (ICD 10) for onward transmission to the Chief Registrar's office. Afterwards, the state government submits this to the office of the Registrar General of India in the standardized format for the national level consolidation.

Scheme of MCCD: Status of Implementation:

In order to take the MCCD Scheme forward in a systematic manner in the country, the Registrar General, India has been impressing upon all the States/Union Territories to bring

all hospitals (Government & Private) and private medical practitioners under its coverage, both in rural as well as urban areas by imposing issue of Notification. In this context it is mandatory for all hospitals (Government & Private) to fill MCCD form along with death report form on Pehchan Web Portal. 5770 hospitals (Government & Private) are reporting under this scheme.

“The provisions of the amended RBD Act 2023” where death occurs in medical institution providing specialized treatment or general treatment, every such institution, irrespective of ownership or death of any person occurring in any place other than medical institution, such person was during his recent illness attended to by a medical practitioner, such medical practitioner shall, after the death of that person, free of charge, forthwith issue, a certificate of the cause of death, including the history of illness, if any, to the person required under this Act to give information concerning the death in such form as may be prescribed, and the person, on receipt of the certificate, shall deliver the same to the Registrar at the time of giving information of the death as required under this Act.”

MCCD Status: State Scenario: Flow of Data and Processing:

The certificates of cause(s) of death certified by the doctors are scrutinized & coded as per ICD-10th revision derived as per the National list prescribed / designed by the Registrar General, India and sent in the prescribed format directly from the institutions covered under the scheme of MCCD on regular basis to the Directorate.

Scope of the report

The Rajasthan State government report on Medical Certification of Cause of Death – 2024 is based upon total 107301 (Males: 69374, Females 37910 and transgender 17) medically certified deaths (22.63 percent of total registered deaths). As mentioned above, owing to different levels of efficiency of medical certification across the State, the number of deaths reported therein may lack the representative feature in the strict sense. However, it may be sufficient to throw some valuable insight into deaths by various cause groups.

2. Findings the introduction of leading cause of death:

During the year 2024 the highest leading cause of deaths are following:

- 1 Diseases of Circulatory System (23.35%)
- 2 Symptoms, signs and abnormal clinical and laboratory findings (18.53%)
- 3 Diseases of Respiratory System (16.53%).
- 4 Certain Infectious and Parasitic Diseases (8.74%)
- 5 Certain conditions originating in Prenatal Period (7.13%)

- Among the major cause group “Diseases of Circulatory System”, have been registered the highest deaths account 56.22% for the ‘Diseases of Pulmonary Circulation and Other Forms of Heart Disease’.

- “Symptoms, signs and abnormal clinical and laboratory findings (18.53%)” is the second leading cause group in which the total deaths have been for this group.
- “Diseases of Respiratory System”, is the third leading cause group, in which the highest deaths account 66.54% for the ‘Other Diseases of The Respiratory System’.
- The fourth leading cause group “Certain Infectious and Parasitic Diseases” in this group the highest deaths have been 61.49% for ‘other bacterial diseases’.
- “Certain conditions originating in Prenatal Period” (7.13%) is the fifth leading cause group in which the total deaths have been for this group.

Finding the introduction of death by the Age group wise:

- Around 12.46% of reported medically certified deaths have been of the infants (age less than 1 year).
- About 57.20% of infant deaths have been reported to be caused by “Certain conditions originating in the perinatal period” out of total infant deaths.
- Around 1.24% of reported medically certified deaths have been of the children aged ‘1-4’.
- Among the children aged ‘1-4’ “Symptoms, signs and abnormal clinical and laboratory findings” have taken the highest toll of 30.63%.
- Around 2.12% of reported medically certified deaths have been of the children aged ‘5-14’.
- In the age group ‘5-14’, major group “Symptoms, signs and abnormal clinical and laboratory findings” is in the topmost position with the share of 29.71%.
- Around 4.95 % of reported medically certified deaths have been in the age group ‘15-24’.
- In the age-group of ‘15-24’, major group, “Symptoms, signs and abnormal clinical and laboratory findings” is the first among the leading causes contributing around 21.71%.
- Around 7.58% of reported medically certified deaths have been in the age group ‘25-34’.
- In the age-group of ‘25-34’, major group, “Symptoms, signs and abnormal clinical and laboratory findings” contribute around 19.67% of death under this age group.

- Around 10.36 % of reported medically certified deaths have been in the age group '35-44'.
- In the age-group '35-44', major leading cause is "Symptoms, signs and abnormal clinical and laboratory findings" having share of 24.69%.
- Around 12.57% of reported medically certified deaths have been in the age group '45-54'.
- For the age-groups of '45-54', the leading causes of death is "Diseases of Circulatory System" having 25.40%.
- 16.38% of the total medically certified death comes under the age group '55-64'.
- In this age group 55-64 the first leading cause of death are "Diseases of Circulatory System" having 29.34%.
- Around 9.26% of reported medically certified deaths have been in the age group '65-69'. The leading cause of death is "Diseases of Circulatory System" (32.73%).
- The age group '70 and above' contributes the maximum incidence (23.07%) of total medically certified deaths. The leading causes of death are "Diseases of Circulatory System" (35.14%).

4. Finding the introduction of death by the Gender wise:

- Out of total medically certified deaths, 64.65% are from male, 35.33% from female and 0.02% from transgender.
- There is significant difference between male, female and transgender for all age groups under medically certified deaths.
- The difference in percentage is significantly high in all age groups.
- For infant age less than one year, 60.59% of deaths are from male, 39.32% female and 0.09% transgender.
- Around 53.83% of deaths are from male, 46.17% female and 0.00% transgender in the age group 1-4.
- 54.31% are male deaths, 45.69% are female deaths and 0.00% are transgender deaths in the age group 5-14.
- 15-24 age group comprises 59.37% male deaths, 40.59% female deaths and 0.04% transgender deaths.
- In the age group 25-34, 66.74% of deaths are from male, 33.26% female and 0.00% transgender.
- Around 73.33% of deaths are from male, 26.66% female and 0.01% transgender in the age group 35-44.

- In 45-54 age group, 70.79 % are male deaths, 29.20% are female deaths and 0.01% transgender deaths.
- 55-64 is the age group in which 65.68% are male deaths, 34.31% are female deaths and 0.01% transgender deaths.
- In the age group 65-69, male deaths are 64.92%, female deaths are 35.08% and transgender deaths are 0.00%.
- In the age group 70 and above, 60.75% of deaths are from male, 39.25% of deaths are from female and 0.00% deaths from transgender.

5. Comparison of MCCD and CRS Data:

The data on MCCD is presented as per the National List based on 10th revision of International Classification of Diseases (ICD-10), to facilitate meaningful comparison and drawing valid conclusions thereof. The report aims at summarizing the findings of the data reported on medically certified deaths for Rajasthan by age, sex and major cause-groups. 'The report on Medical Certification of Cause of Death – 2024 is based on 107301 (Males: 69374, Females: 37910 and transgender: 17) medically certified deaths. This represents 22.63% of total registered deaths in the State during the year 2024.

Table 2.1 Number of deaths reported under CRS and MCCD

Year	Registered Deaths under CRS	Institutional Death	MCCD	Percentage of MCCD to total Deaths	Percentage of MCCD to Inst. Deaths
2023	464477	114793	93986	20.23	81.87
2024	474072	116043	107301	22.63	92.47

Table 2.1 gives a comparison of death under Civil Registration System (CRS) and Medically Certified Death. It may be noted that in the year 2024, 22.63% of total registered deaths in the state are medically certified, which in the year 2023 was 20.23%.

Table 2.2 Age wise number of deaths reported under CRS and MCCD

Age group	Registered Deaths under CRS	MCCD	Percentage of total Deaths
Less than 1	13495	13368	99.06
1-4	2351	1332	56.66
5-14	6717	2272	33.82

FORM NO.4

(see rule 7)

MEDICAL CERTIFICATE OF CAUSE OF DEATH

(Hospital In-patients. Not to be used for still birth)

To be sent to Registrar along with Form No. 2 (Death Report)

A copy of this certificate to be provided to the nearest relative of the deceased

Name of the Hospital

I hereby certify that the person whose particulars are given below died in the hospital in Ward No

On

D	D	-	M	M	-	Y	Y	Y	Y
---	---	---	---	---	---	---	---	---	---

 at.....A.M./P.M.

NAME OF DECEASED:		First Name	Middle Name	Last Name	For use of Statistical Office
Sex	Age at Death				
	If 1 year or more, age in years	If less than 1 year, age in month	If less than one month, age in days	If less than one day, age in hours	
1. Male 2. Female 3. Transgender Person					
<u>CAUSE OF DEATH</u>					Interval between onset and death approx.
I Immediate cause State the disease, injury or complication which Caused death, not the mode of dying such as heart Failure, asthenia, etc.	(a) due to (or as a consequences of)				
Antecedent cause Morbid conditions, if any, giving rise to the above Cause, stating underlying conditions last	(b) due to (or as a consequences of)				
II Other significant conditions contributing to the death But not related to the disease or condition causing it	(c)				

Manner of death

1. Natural 2. Accident 3. Suicide 4. Homicide
5. Pending investigation

How did the injury occur?

If deceased was a female, was pregnancy the death associated with? 1. Yes 2. No
If yes, was there a delivery? 1. Yes 2. No

Name and signature of the Medical Attendant certifying the cause of death

Date of verification:

D	D	-	M	M	-	Y	Y	Y	Y
